Важность единой системы идентификации авторов: рекомендации из журналов *Lancet* и *Science*

Enserink, M. (2009). Are You Ready to Become a Number? *Science*, 323(5922), 1662-1664.

<http://www.sciencemag.org/content/323/5922/1662.summary>

That's why, in a paper in *The Lancet* last summer, the duo recommended that every scientist sign up for ResearcherID, a free system that promises to do away with such confusion by assigning every scientist a number. If everyone enrolled, they claimed, it would be much simpler to retrieve someone's complete publication record or to follow someone's career path. "It would make life a lot easier," says A-1262-2007.

ПРОБЛЕМЫ С ИДЕНТИФИКАЦИЕЙ АВТОРОВ

- Однофамильцы (иногда с одинаковыми инициалами)
- Различные варианты написания латинскими буквами
- Разные форматы указания фамилий и имен в различных журналах
- Ошибки и опечатки
- Изменение фамилии
- Изменение места работы
- Различные области исследований

ПОСЛЕДСТВИЯ ДЛЯ АВТОРА

- Грантовым организациям сложно идентифицировать ваши работы
- Руководству вашей организации сложно оценить и вознаградить вашу публикационную деятельность
- Подсчет цитируемости и h-индекса затрудняется
- Возникают проблемы с развитием и продвижением своего исследовательского бренда.

РЕШЕНИЕ

Поиск по Researcher ID

RESEARCHERID

Search ResearcherID | Top Keywords | Top Countries/Territories | World Map

Search using one or more of these fields:

Last/Family Name: Example: Smith

First/Given Name: Example: J or James

also search "other names"

Institution: Example: Drexel

also search "past institutions"

Country/Territory: Kazakhstan

Keyword: Example: bioethic*

Or, enter the researcher's ResearcherID: Example: A-1009-2008

Search Tips

You can find researchers who have registered with ResearcherID.

To search for a researcher, enter their name. For a first name, try entering either just an initial or the entire first name. Check the "other names" checkbox to search the Other Names field for either the last name or first name search terms.

Use the wildcard character * at the end of a word to find matches with any ending (for example, Penn*).

Or, if you know it, you can enter just the researcher's ResearcherID.

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the *Web of Science* and is ORCID compliant, allowing you to claim and showcase your publications from a single one account.
